

A booking system under your brand, with an optional customer app

For boat-tour, dive, fishing, and charter businesses: bookings, payments, waivers, texts, rental gear, and trip changes in one place.

**PLAIN-LANGUAGE
CONCEPT**

The product, prices, and timing are still being tested.

Bookings, payments, waivers, messages, and gear in one place

Customers could book and prepare. Staff could see what is paid, signed, reserved, or needs attention.

SELL THE TRIP

Show trips and take bookings

Shared trips or private charters
Online, phone, or walk-up
Schedules, boats, seats, and cutoffs
Add-ons, fees, taxes, and promo codes

GET PAID + READY

Collect money and paperwork

Full payment or a deposit and balance
Guest and participant details
Digital waivers, including guardians
Rental gear and size requests

STAY CONNECTED

Handle changes and repeat visits

Email and text confirmations
Arrival and weather updates
Guest cancellations or rescheduling
Refunds or service credits
Tip requests and trip packages

Everything would stay tied to the same booking.

Web booking is included. A native app is optional.

Both would use the same trips, bookings, customer details, and payments. You would not manage two separate systems.

BRANDED WEB BOOKING • INCLUDED

Book from any browser

Customers tap Book on your website
No app download required
Uses your name, colors, trips, and boats
Book, pay, sign waivers, and manage the trip
Works for every customer

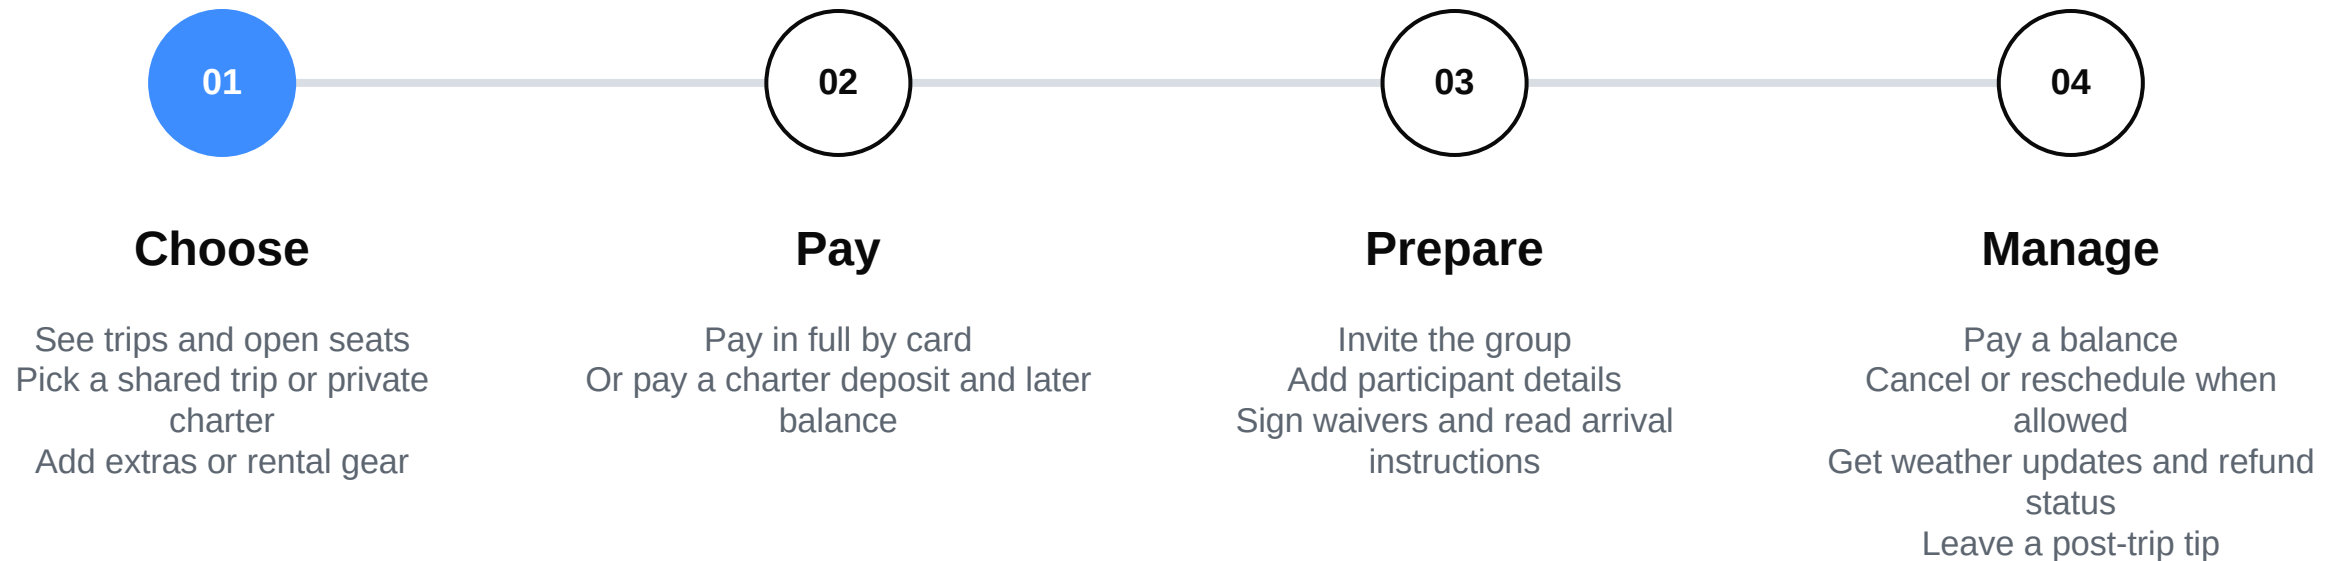

OPTIONAL CUSTOMER APP

A customer app in the Apple and Google stores

Your branded customer app, powered by TideGrid
Your name, colors, and app icon
One app for your business, with all your boats
Push alerts, saved details, and upcoming trips
Most useful for repeat customers

Guests could handle the whole booking from their phone

A first-time guest would not need an account. A secure link would bring them back to the same trip.

Staff could manage each booking in one place

A calendar and trip list would show what needs attention before the boat leaves.

CALENDAR + CAPACITY

Trips, boats, open seats, cutoffs, blackouts, and booking holds

BOOKING RECORD

Customer details, participants, notes, history, and phone or walk-up bookings

PAYMENTS

Paid, deposit, balance due, refund, credit, or outside payment

WAIVERS

Signed or missing, correct form, guardian signature, and signed copy

RENTAL GEAR

What is reserved, size and quantity, price, and blocked-out inventory

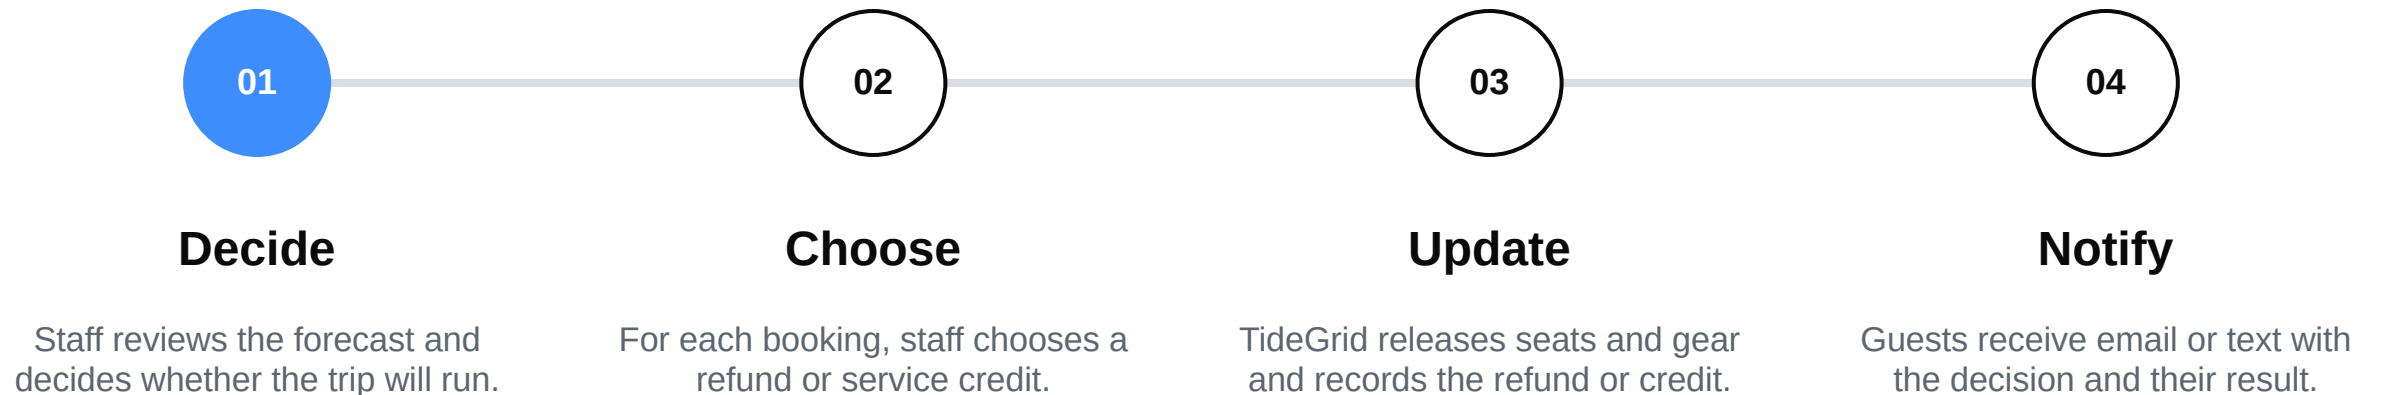

MESSAGES + REPORTS

Email and text status, trip roster, revenue, tax, tips, and refunds

PAYMENT • WAIVER • GEAR • GUESTS, ALL IN ONE LIST

One trip change could update every related record

Example: staff reviews the weather and cancels a trip. The software never makes that decision.

You keep the money and the business decisions

TideGrid would provide booking software. It would not run your operation.

YOU CONTROL

Your rules, customer payments, and trip decisions

- Set your prices and booking rules
- Approve your waiver wording
- Decide whether each trip runs
- Choose refunds or service credits
- Customer card payments go to your Stripe account

NOT IN THE FIRST VERSION

TideGrid is not trying to run the boat

- No live connection to Viator, GetYourGuide, or Expedia
- No marketing campaigns or WhatsApp
- No crew, payroll, manifest, or maintenance tools
- No automatic weather decisions
- No points, gift cards, or per-item gear tracking

Software, setup help, and the app are separate

BOOKING SYSTEM

\$149 / month

+ 1.5% of completed booking sales*

\$0 setup if you configure it yourself

Two active boats included

12-month commitment

Minimum Booking System fees:

Not currently available

*Completed booking sales managed in TideGrid; taxes, tips, and refunds excluded. Stripe, texting, domain, and app-store costs pass through at cost.

Help us find what is useful, missing, or unrealistic

THIS MAY FIT IF YOU HAVE

- ✓ 1–5 boats
- ✓ Most bookings come directly to you
- ✓ Customers who book again
- ✓ Staff switching between several tools

IN A 45-MINUTE REVIEW

- 01 Walk through one real booking
- 02 Show what happens when plans change
- 03 Review your current tools and costs
- 04 Challenge the web, app, features, and price

No purchase decision is required. TideGrid is not accepting deposits.
